

Car seats are different than when you were a kid.

- 1. Children are 5 times safer in rear-facing car seats.** Leave them rear-facing until the seat allows or at least until 2 years of age.
- 2. Use a high weight harness car seat.** These car seats allow for added protection by using a harness beyond the standard 40 lbs.
- 3. Don't rush the transition from booster to seatbelt.** Many kids aren't ready for a seatbelt at 8 years old.
- 4. Stick to the back seat.** Keep kids in the back until they are 13.
